

## Optiflora prebiotic and probiotic supplements

### Description

#### Optiflora prebiotic and probiotic supplements

The healthy body contains trillions of “friendly” microorganisms. The vast majority of them live in the colon, where they perform a multitude of health-supporting tasks. Their most important role is helping to maintain a healthy balance with other less desirable organisms. Enhancing the friendly microorganisms can promote long-term colon health. **Optiflora Probiotic** promotes colon health by supporting the growth of healthy micro flora naturally found in the colon.\* **Optiflora Probiotic** delivers guaranteed live probiotics Bifidobacterium longum and Lactobacillus acidophilus. The *Optiflora Prebiotic Complex* enriched with Inulin and FOS (fructooligosaccharides), *Optiflora Prebiotic Complex* delivers important nutrients that healthy intestinal bacteria need to grow and thrive. Optiflora also has gamma-tocopherol, a nutrient associated with colon health.\*

#### **Who Might Benefit from Optiflora?**

##### **Who could benefit from beneficial intestinal microflora?**

- People whose dietary choices may affect the balance of gastro intestinal micro flora.
- Individuals who frequently or chronically take antibiotics.
- Children who frequently take antibiotics for ear infections.
- Anyone planning foreign travel.

Optiflora Probiotic Complex features triple layer encapsulation technology, which helps ensure potency and guarantees live delivery of Bifidobacterium longum and Lactobacillus acidophilus to the intestine. Without this special protection, probiotics – live organisms — can be destroyed before they reach the large intestine, where they provide the greatest benefit.

It has been estimated that we have more bacteria in our intestinal tract than cells in our body. One of the most important ways that beneficial microflora promote health is by simply existing in large numbers. Research studies indicate that normal, healthy colonies of Lactobacilli and Bifidobacterium can help maintain a healthy balance between beneficial and undesirable bacteria. Scientists believe this healthful standoff is achieved in several ways by:

- enhancing immunity
- maintaining the acid pH of the intestinal environment
- competition for nutrients and adhesion sites
- actively support healthy colony cells
- detoxification
- maintain healthy, normal populations of beneficial microflora, even in people taking antibiotics

**Optiflora** is a unique, two-product system that supplies both beneficial bacteria (probiotics) AND the nutrients they need to thrive (prebiotics) to provide complete dietary support for the healthy balance of intestinal microflora.\* *Optiflora's* state-of-the-art seamless capsule is guaranteed to withstand the acidic environment of the stomach to deliver live beneficial bacteria to the intestine.

**What are Prebiotics?** They are nutrients which selectively feed the friendly bacteria and Probiotics are supplemental populations of the “friendly bacteria” residing in the colon which help to maintain healthy intestinal microbial balance. The term Probiotic literally means “healthful for life.”

Remember only Shaklee [Optiflora](#) can guarantee delivery of both prebiotics and probiotics encouraging growth and multiplication.

\*\*Optiflora rebuilds health possibly quicker than any other product we have to offer! Just what does this product do?? Basically, it helps maintain one’s health by adding 500,000,000 living flora to the intestinal tract with each serving! Since both advanced aging and disease are directly tied to the intestinal tract, this product should be one of the first following the Rx for a Healthier Life™!

At birth each of us are born with a healthy intestine loaded with positive and healthy flora (bacteria) and we are probably as healthy as we ever will be! As we mature, and we are exposed to the environment, to stress, to others’ ailments, through the process of aging – all of these – cause disease-causing bacteria to invade our intestines! Slowly, the bad bacteria overcomes the good flora! Before this product was introduced, there was NO WAY to add new and living flora to the intestines! Now, because of Shaklee’s research team, we can! Yes, **Optiflora** is the ONLY product on the market that delivers living flora directly to the intestines! It’s powder and a pearl and it is recommended that it be taken (together) once a day! Since nearly every illness comes from the colon (intestines), *Optiflora* is possibly the ‘most effective’ preventative health product available!

Keep your digestive system on track. Every cell, tissue and organ in your body depends on healthy digestion and nutrient absorption for well-being. Occasional upsets can be caused by changes in your routine, diet, stress, travel and other factors. Our natural solutions support a healthy digestive system, can help to restore a natural balance, and protect against occasional digestive upsets.

### **WHAT DESTROYS YOUR GOOD BACTERIA?**

1. Antibiotics, pesticides, insecticides and herbicides in our food supply
  2. Many prescription and over the counter medications
  3. Solar radiation and pollution
  4. The aging process, especially menopause, and common infections and viruses.
  5. Various laxatives & enemas
  6. Bacterially contaminated meats, eggs, dairy & other foods, and a low-fiber diet
  7. Birth control pills, alcohol and steroid drugs
  8. Mental or physical stress

### **What is the solution?**

Take a supply of healthy bacteria (Bifidobacterium & lactobacilli) in a supplement form and a prebiotic to feed the healthy bacteria "Optiflora" by Shaklee. Will this combination prevent serious health problems? Yes, yes, yes, yes in many ways!!!!

1. Eliminate most of children's chronic illnesses
2. Improves mineral absorption (prevent osteoporosis, blood pressure problems, headaches, allergies, & mood swings)
3. Stop over growth of yeast in body – eliminate candida (cause of many allergies, chronic infections and serious colon problems)
4. Lower cholesterol by creating an acid environment to convert cholesterol to a form the body can't reabsorb
5. Prevent diarrhea or "traveler's trots"
6. Improve energy by improving absorption of all nutrients, reducing your taste for sweets
7. Rebuild immune system of which 50/60 percent is in the intestinal wall
8. Prevent colon cancer, by keeping bile secretions from being converted to dangerous irritants
9. Protective, if you need chemo or radiation treatment
10. Stop chronic skin, ear & throat infections

Remember a healthy body reflects a healthy intestinal tract. **Optiflora** is a unique, twoproduct system that supplies both beneficial bacteria (probiotics) AND the nutrients they

need to thrive (prebiotics) to provide complete dietary support for the healthy balance of intestinal microflora.\* [Optiflora](#)'s state-of-the-art seamless capsule is guaranteed to withstand the acidic environment of the stomach to deliver live beneficial bacteria to the intestine.
